HPMS Data Analyst (GIS)			100	$0.00
Administrative Assistant			20	$0.00
			Average Hourly Rate =	$0.00

Signed: _____

Print Name: _____

Offerors shall provide a fully inclusive, lump sum Hourly Rate for every Personnel Category. Rates must include profit & overhead. These shall be the only eligible costs payable to the Consultant except for reimbursable expenses which require Pre-Approval from RIDOT.

Offerors shall designate one Project Manager. However, multiple individuals may be proposed for the other personnel categories provided their qualifications are included in the Tech Proposal.

The hourly rates shall be effective for the initial three year contract term. If this contract is extended for any additional one-year terms, then prior to that extension, the parties will agree upon additional compensation terms.

Project Hours are included in the Average Hourly Rate calculation to account for the estimated level of effort for each Personnel Category. Actual Hours to complete the project will be higher.

The Average Hourly Rate is calculated as follows: Hourly Rate x Project Hours = Cost. Sum of the costs divided by 1000 = Average Hourly Rate.

Offerors that do not utilize this Cost Proposal sheet may be disqualified from further consideration.
