

PSG09 RFP#2 Expansion Project

Specific to a question received on the existing tower located at the Salty Brine State Beach:

The Salty Brine State Beach Tower that holds a small wind energy generation system at its very top is owned by the RIDEM. The tower was fabricated by Rohn Towers and installed by a local contractor, with Northeast Engineering Consultants of Middletown as the supervising firm. Dan Seymanski at Northeast Engineers can be reached at 401-849-0810. The attached PDF details the specs on the tower. The Rohn website details appurtenances that can be used to accommodate add-ons, such as what we are seeking in the RFP.
