#### Part 2 Scope of Work

##### Section 2.2 Establishing Qualified Substitution "or Equal" products

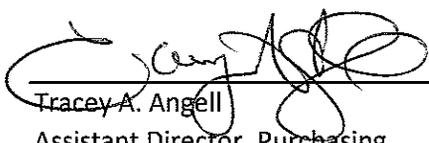

1) B1a asks for a line by line comparison illustrating where the product is in fact an "equal product". Would a simple spec sheet and image be sufficient instead of outlining specifics on an Equal product?

Answer: No, per the bid specifications, substitutions must contain a line by line comparison of the specifications.

#### Attachment "A"

2) Should an Olympic Platform and insert be quoted with Item #1 in Attachment A? The layout from Moser Pilon Nelson shows platforms/inserts with the 8" Half Racks.

Answer: The platforms will be built as part the construction base bid. There is no need for the Olympic platform and insert.
