From: 11/20/2013
To: 11/22/2013

Tracey A. Angell
Assistant Director, Purchasing
University of Rhode Island

Bid No. 2422 Questions and Answers:

1. Graphic Displays Item 1.06A Mock Up

a. Type 1 Artwork - Provide Graphic Image (electronic art) so we can figure the cost for the preparation and production of this panel We need to see the colors, layouts, if photos are used on the on the panel etc.

Answer: Attached are examples of the art (not finalized) in pdf format and in order of:

- i. **General Display (Basketball, Volleyball, Golf pic)**
- ii. **Sports Display (baseball pic)**
- iii. **Donor Wall (names)**
- iv. **RI Logo (two color)**
- v. **Small Square Plaque**
- vi. **Freestanding Display Unit (glass film example. This will be a "negative" image cut out of frosted film.)**

b. Graphic Display Type 1- Provide actual art of the Type 1 Panel showing intent of Direct Print on brushed aluminum

Answer: Same as 1a answer

c. Graphic Display Type 2- Provide art work for digital print

Answer: Same as 1a answer

d. Cut out logo Type G

1. The specification for the construction of this 8' x 10' letter needs clarification

Answer: .125 Aluminum panel (brushed aluminum finish) adhered to .50" PVC (Sintra or similar) backing for an overall thickness of .625"

2. What is the overall thickness of the cut out?

Answer: .625"

3. What is the material construction: .125 Aluminum over .50 PVC??

Answer: .125 Aluminum panel (brushed aluminum finish) adhered to .50" PVC (Sintra or similar) backing for an overall thickness of .625"

If this is the case, there is no way to bond and hold the .125 face to the PVC since there are no face fasteners allowed d.

Answer: Provide threaded studs on back. 12"O.C. +- as one suggested method.

4. What are the colors of the letters: 1 tone-2 tone??

Answer: Same as 1a answer The "RI" logo will be the 2-tone URI logo

5. We need to see the finished image for color e.

Answer: Same as 1a answer

6. The overall construction of this letter is requested to be .50 PVC without the aluminum face with digitally printed face. This will substantially reduce the weight of the logo

Answer: The overall construction is a .125" thick aluminum panel (with digitally printed face) fully adhered to .50" PVC to create the overall desired thickness of .625"

e. Graphic Display Type 3 Item F

1. Spec calls for reverse printed and applied to second surface. No substrate is specified for mounting the graphics ie are they 1/4" acrylic panels?

Answer: "F" display is an existing storefront with tempered glass.

2. There is no indication of how these panels are attached to the wall surface.

Advise mounting method

Answer: Film is applied to the existing tempered glass.

3. Provide typical graphic images **Answer: Same as 1a answer**

2. SK-2

A Please clarify if the quantity shown on SK-2 is the total amount or per. For example, A – shows 2 sections with the quantity of 4 ea. Is the total number 4 or 8?

Answer: 8

B. The section shows 4 and the quantity 1 ea. Are we quoting one panel at the size defined or 1 of the 4 panels? D shows 5 panels. Would it be 10 panels total, 5 at 2 each?

Answer: Each "Display" shows the number of "Graphic Displays" w/ alum standoff quantities. The number of "Displays" are also shown on SK-1. Example; "D" Shows a "Display" (2 each) w/ 5 "Graphic Displays" for a total of 10- 3'-0"X7'-0" "Graphic Displays" and 6 alum standoffs each.

3. Spec Section Part 4 Page 7 Missing Full Size Prints 1. Graphic Display specification sheets for drawings:

SK1 Graphic Panel Locations

SK2 Only Details D & F are shown

SK3 All details are cut off ie details G, H, I & J

The full drawing sheets were not scanned.

They are 11" x 17".

Where are the full size drawings available? The availability is critical so we can ask questions by the 8th.

Is there a place where the full size pans can be viewed and/or ordered, or available on a disk?

Answer: In response to the above, it appears there may be a compatibility issue when viewing these documents if you are logged into the RIVIP website. When you visit www.purchasing.ri.gov and view a bid, please do NOT log in. You will receive a pop-up message that indicates you must log in; please just click OK to bypass the message and proceed to open the documents.

4. Drawing SK-3 detail G- 10' Cut Out Logo 1. Section 2.02 Type 2 does not reference specification for the individual 10' logo ie material thickness or color Is it .125 aluminum panel or .50 PVC. Please Advise

Answer: See answer 1.D.c.

5. Digital Graphic Reproduction

a. The digital graphic reproduction uses "CMYK" color formatting.

Answer: Yes

b. Are the Graphic Files created using this color system??

Answer: Same as 1a answer

c. Are the digital files available for viewing prior to bidding?? It is important to understand the graphic images we are being asked to manufacture.

Answer: Same as 1a answer

6. Is the University going to post the advertised bidders ie if there was a pre-bid meeting, there would be a sign in sheet and they would be posted as an addenda.

Answer: No Pre-bid was held for this bid package

7. Site Visit -Can a site visit be arranged for field measurements, conditions and equipment needs?

Answer: The space for the graphics panels are all in public spaces. If desired the bidding vendors can access these spaces between 8am – 5pm M-F

8. Graphic Panel Type 1-Back Panel - Aluminum panels are available pre-finished in material thickness of only .080 2. If .125 aluminum panels are required, they have to be sanded or painted and/or clear coated.

Answer: If needed, .080 pre-finished brushed aluminum can be adhered to .040" aluminum to get required thickness and effect.

Advise finish or paint color

Answer: Finish is standard brushed aluminum, no painting required.

9. Graphic Panel Type 2

a. Please clarify material specification

Answer: .125 Aluminum panel (brushed aluminum finish) adhered to .50" PVC (Sintra or similar) backing for an overall thickness of .625"

b. .125 Aluminum Face Panel mounted on cellular PVC .50?

Answer: .125 Aluminum panel (brushed aluminum finish) adhered to .50" PVC (Sintra or similar) backing for an overall thickness of .625"

c. This product is called DiBond and we need clarification as to the specification and intent.

The Aluminum face of this material is not .125 thick.

Answer: DiBond is a composite material with two layers of thinner aluminum sheets sandwiched over a polyethylene core – The specifications and design intent is a .125" thick brushed aluminum panel with digital printed face

d. We need the color of the background panel. Are there specified materials available to review at our on-site visit?

Answer: The background panel (PVC) will be black . Specified materials are not available for review

1997-98 MEN'S BASKETBALL TEAM

The eighth-seeded Rams advanced to the Elite Eight of the 1998 NCAA Tournament, defeating Murray State, 97-74, in the first round before facing the top-ranked Kansas Jayhawks in the second round. Paced by Cuttino Mobley's 27 points and another 20 from Tyson Wheeler, the Rams took down the Jayhawks, 80-75. URI then got past Valparaiso, 74-68, to advance to the Elite Eight where a heartbreaking 79-77 loss to Stanford ended Rhody's magical run.

1996 VOLLEYBALL TEAM

(L-R) Karla Bragg, Lauren Maselli, Nicolle Becker, Nikki Noya, Angela McHenry and Jessica Salmans were part of the 1996 Atlantic 10 Championship team that won 31 matches and advanced to the NCAA Tournament. The Rams played three nationally-ranked teams that season, including No. 1 Hawaii (pictured), with Maselli and Salmans each earning All-Region accolades.

DANA QUIGLEY

A team captain and All-American golfer, Dana Quigley led the Rams to four consecutive Yankee Conference golf titles and was an individual medalist at the 1969 New England Championship. After graduation, he enjoyed a fine professional golf career, which included 11 victories on the Senior PGA/Champions Tour.
