SECTION 2 – SCOPE OF WORK

BACKGROUND AND PURPOSE

INTENT: The Rhode Island Nonpoint Education for Municipal Officials Program (RI NEMO), housed at URI, has a five-year agreement with Rhode Island's Department of Transportation (RIDOT) and Rhode Island's Department of Environmental Management (RIDEM) to help provide public outreach, education, involvement, and participation support for Stormwater Phase II federal requirements. In furtherance of the objectives of that agreement, we are seeking to hire a vendor who can provide training, testing, and credentialing about soil erosion and sediment control, specific to RI guidelines and standards, including the RI Pollutant Discharge Elimination System (RIPDES) Stormwater Program, the Rhode Island Stormwater Design and Installation Standards Manual, and the RI Soil Erosion and Sediment Control (SESC) Handbook (all available on the RIDEM website at www.dem.ri.gov/programs/benviron/water/permits/ripdes). The training and testing must be online and on-demand, suitable for a variety of RIDOT and RIDEM staff, with the potential

to transfer that training and testing opportunity to municipalities, other RI Municipal Separate Storm Sewer Systems (MS4s), consultation professionals, and private contractors who work in RI.

SPECIFIC REQUIREMENTS:

- **The initial contract will be for one (1) year with the Option to extend two (2) additional years , contingent upon the continued availability of funding for this project.**
- **The vendor must have proven experience providing online, on-demand training and online, on-demand testing about soil erosion and sediment control to other state agencies or local governments. A sample of this should be provided as part of the proposal submitted.**
- **The vendor must be willing to customize any existing training to RI guidelines and standards, using RIPDES, the Rhode Island Stormwater Design and Installation Standards Manual, and the RI SESC Handbook, without significant development input required from RI NEMO or our stage agency partners. Review by RI NEMO and our state agency partners is expected.**
- **The vendor must be able to provide training that is differentiated by audience need. The audiences addressed should include, but are not necessarily limited to, general staff awareness, construction staff, inspectors, designers, and plan reviewers.**
- **The online training must be engaging and include video elements, showcasing field installations and maintenance of soil erosion and sediment control best management practices**
- **The online training must have resources and handouts that can be printed by the student.**
- **Because the training will be online, the vendor must be able to provide customer support to students taking the training. Student questions about registration issues should be resolved within 48 hours. Student questions about topics other than registration (in the event content-related questions arise) should be compiled and shared with RI NEMO on a regular and frequent basis.**
- **The vendor must be able to manage all administrative tasks associated with the provision of the training and testing, including, but not limited to, registration of students, monitoring learner records, and regular, frequent database transfers (in Excel format) to RI NEMO, RIDOT, and RIDEM to verify credentialing. Results must be easily accessible online for the general public. The vendor must provide credentialing identification for the student, such as a wallet card.**
- **The vendor must be willing to update training to accommodate new standards or technologies, as appropriate within the general parameters of the final agreement.**
- **The vendor must monitor testing for trends indicating students' lack of understanding and for general improvements.**
- **The vendor must provide publicity materials about the training for RI NEMO's use in increasing participation.**
- **The vendor must be able to provide training and testing for the awareness and introductory construction staff levels within three weeks of the RFP award.**
- **The vendor must be available, without additional cost, to meet face-to-face at least twice a year, at URI's Kingston Campus or at state agency offices in Providence, if needed by RI NEMO, RIDOT, or RIDEM.**
- **The vendor must have a competitive pricing structure.**

GENERAL DESCRIPTION: The vendor will provide online, on-demand training and online, on-demand testing (resulting in credentialing) for RIDOT and RIDEM staff (including, but not necessarily limited to, general staff, construction staff, inspectors, designers, and plan reviewers) on the topic of soil erosion and sediment control, specifically customized to RI guidelines and standards. This training and testing also should be available to other interested audiences, including MS4s and private contractors. The vendor will manage all administrative tasks associated with the provision of the training and testing and share the results regularly and frequently with RI NEMO and our state agency partners.

GENERAL SCOPE OF WORK TO BE PERFORMED: The vendor's existing soil erosion and sediment control training should be customized to RI guidelines and standards, including RIPDES, the Rhode Island Stormwater Design and Installation Standards Manual, and the RI SESC Handbook. The online, on-demand training and testing for the basic levels (such as an awareness level and a general construction staff level) should be made available within three weeks of the RFP award. Additional, advanced levels will be provided in subsequent years (2017 and 2018), contingent upon the continued availability of funding for this project.

The vendor will provide RI NEMO, RIDOT, and RIDEM with quarterly updates of the database of students who have registered and who have completed testing successfully, and the vendor will make that database publicly searchable. The vendor will provide the students with customer support to facilitate training and completion certificates such as wallet cards. The vendor will meet face-to-face with RI NEMO when necessary to discuss customization and/or delivery of the training.

The vendor will provide RI NEMO with publicity materials about the training, so that we can advertise its availability to other non-state agency entities. The vendor will include a pricing plan for MS4s and other private contractors, indicating at what rates each level of training and testing would be offered for those audiences.

PROJECT KEY COMPONENTS:

- Soil erosion and sediment control training, customized to RI guidelines and standards, as outlined above, provided online, including video components that feature best management practices
- Training that is differentiated by audience level, including, but not limited to, general staff, construction staff, inspectors, designers, and plan reviewers
- Online testing of that training (with the exclusion of a shorter, general awareness course), resulting in credentialing, recorded in a searchable database, updated at least quarterly and provided to URI, RIDOT, and RIDEM staff.
- Customer service and completion certificates for students taking the online training

Cost calculated as lowest responsive cost proposal divided by (this cost proposal) times 30 points*	30 Points
Total Possible Points	100 Points

*The Low bidder will receive one hundred percent (100%) of the available points for cost. All other bidders will be awarded cost points based upon the following formula:

$$(\text{Low bid} / \text{venders bid}) * \text{Available points}$$

For example: If the low bidder (Vendor A) bids \$65,000 and Vendor B bids \$100,000 for monthly cost and service fee and the total points available are Thirty (30), Vendor B's cost points are calculated as follows:

$$\$65,000 / \$100,000 * 30 = 19.5$$

Points will be assigned based on the offeror's clear demonstration of his/her abilities to complete the work, apply appropriate methods to complete the work, create innovative solutions and quality of past performance in similar projects.

Applicants may be required to submit additional written information or be asked to make an oral presentation before the technical review committee to clarify statements made in their proposal.
