MASTER PRICE AGREEMENT (MPA-419)  
12/14/2009 – 6/30/2017

IN THE CASE OF A MULTIPLE AWARD, AGENCIES SHOULD CONTACT 3 VENDORS (OR 2 IF ONLY 2) LISTED ON THE MPA IN SEARCH OF THE LOWEST RATES. PLEASE NOTE:

THIS MASTER PRICE AGREEMENT SHALL BE UTILIZED BY THE VARIOUS DEPARTMENTS AND AGENCIES OF THE STATE FOR INTERMITTENT PROJECTS WHERE TOTAL COSTS WILL NOT EXCEED \$50,000. PROJECTS EXCEEDING \$50,000 SHALL NOT BE ALLOWED UNDER PROVISIONS OF THE MPA WITHOUT PRIOR APPROVAL AND WRITTEN AUTHORIZATION FROM THE DIVISION OF PURCHASES.

**5. VENDOR QUALIFICATIONS**

Please respond to the following questions and information requests. Note: As part of the scope of this RFP is installation and repair services for existing security systems, Vendor must specify which manufacturers and product lines apply in the responses below. Where answers to the same question differ by manufacturer / product, Vendor must clearly delineate this in the response.

As specified previously in the Current Environment section, there are several security system platforms for which service is being requested, including DSX, Paradox, and Ingersoll Rand, Interflex, Synergistics, as well as a variety of system components from other manufacturers, including Schlage, Von Duprin, Pelco, and Locknetics.

**5.1 Experience**

How many years of industry experience does the Vendor have providing installation, maintenance, and support for security systems?

For each of the product lines carried or supported by the Vendor, how long have you carried/supported this product line?

*Eastern Technologies began as (Eastern Alarm) back in 1988 We started out using the Radionics's product line. Beginning in approximately 1992 we took on the NAPCO product line of panels. The NAPCO 1008 control panel was prevalent during the 1990s with the 1016 and 1032 models being upgrades and the 2600 and 3200 later becoming their top of the line offers. In late 1995 we began using exclusively, the DSC product line. At that time DSC was at the forefront of this industries technological advancements. With computer technology becoming more and more a part of our industry, enter, **Paradox***

*Once we were exposed to what paradox was doing in 2002, we quickly realized that they had their finger on the pulse of the industry. Their software was far more advanced and versatile than any other manufactures and to this day they still are the only company to offer "Addressable" motion detectors. The ability to connect to a motion detector directly by internet or phone line, and control its function both saves the end user in service calls and false alarm fines from state municipalities. In 2004 we became Eastern Technologies Inc. Having now such a broad range of services, we felt we were being "pigeon holed" into just Burglar Alarms. Our services now extend to Access Control, CCTV, Wireless Security, Network services and Computer troubleshooting.*

5.2. Number of Installations (Included in Proposal)

5.3. Training and Certification

For each of the product lines offered by the Vendor, list training and certifications completed through trade organizations and/or manufacturers. Indicate if certifications are company-wide or by individual. (If individual, list below in 5.6)

*NFPA – (National Fire Alarm Protection Association) training course Cambridge MA 1986*

*State of RI Competency test for Burglar Alarm License. 1988*

*Paradox- Factory training at countless seminars hosting by various Paradox Reps  
“Certified Paradox factory Tech.”*

*DSC-Countless number of DSC seminars and training sessions at various locations both RI and MA.*

*Ademco week long training session in Syosset, NY (their plant) 1982*

5.4. References (Included in Proposal)

5.5. Resumes (Included in Proposal)

5.6. Number of Support Technicians

How many support technicians are there in the Contractor’s employment in the Rhode Island area who are experienced in the repair of security systems and components? Specify the number of certified technicians for each product manufacturer / line that you support.

*THREE*

5.7. Location and Coverage Area of Support Technicians

Identify the base location(s) and the coverage area(s) for the technicians who would be expected to provide services to the Customer.

Within this coverage area, these technicians maintain services for how many unique customer sites?

*STATEWIDE COVERAGE*

## 5.8 Emergency Repair Services

How would the Customer summon emergency repair services on weekends, holidays, or other non-business hours? Provide appropriate primary and backup contact information.

*Primary Service Phone Number: 401-943-9393*

*Backup Service Phone Number: 800-388-3803*

*Service Tech cell phone: D Card 401-639-7774    dave@techri.net*

*Service Tech cell phone: R Mancini 401-641-7774    inspace@cox.net*

*E-mails:            service@techri.net*

*billing@techri.net*

## **6. MAINTENANCE/REPAIR REQUIREMENTS**

Note: Some responding vendors may provide sales or distribution of equipment only, and rely on integrators to provide installation and maintenance to the end user. Vendors that do not provide support and/or maintenance services do not need to respond to the requirements of this section. Instead, simply indicate such in your response, and include a list of authorized and/or recommended contractors through which installation and maintenance are available. (Ideally one or more of these contractors will have been notified by you of your intention to submit for this RFP, and will have submitted a corresponding proposal for the installation and maintenance.)

### **6.1. System Maintenance**

Vendor must be capable of the repair or replacement of all system components for the existing security system(s) for which services are being proposed, including but not limited to:

- System software

Vendor shall have a qualified support technician complete the necessary repairs within 24 hours of request (next business day, with option for security department to request emergency service that would include weekends/holidays).

Please specify average and maximum lead times for obtaining parts for the existing system.

*Response time for emergency service is 1hr. Response time for average service call is Same day if called in before 10am and by next morning if called in after 10am*

*Parts can usually be obtained on the same day. In the event we don't have the part, a 1 to 2 day order time can be expected. Maximum time to obtain a part can be 1 week. If part is out of production or no longer supported by the manufacture, you will be notified during the service call.*

## 6.3. Installation of Additional System Components

At Customer's request, Vendor shall provide the installation of additional components that fully integrate with the current security system(s) for which Vendor is proposing services. This includes the component types listed previously under System Maintenance. Installation of new components shall be coordinated with Customer so as to provide minimal disruption to the system. All new installations shall come with a minimum one-year warranty on hardware, software, and labor.

*All Equipment under warranty for one year and labor is warranted for the life of the system!*

## 6.4. System Upgrades/Replacement

The Customer may seek to migrate its disparate security systems on campus to a more unified platform to simplify administration, operation, and maintenance, and provide a common base for future growth. This could consist of replacing existing systems with a single enterprise-wide system, or implementing a product that will interface with existing systems to provide a central point of administration. An important component of a new system is the capability of closely integrating with security cameras and digital video recording devices.

*Please read ICT section of the proposal*

## 7. PRICING

**Note about requested pricing:** Customer is seeking pre-negotiated labor rates for repair, and hardware/installation rates for adding standard security components to the existing security systems. All quoted labor and parts rates are to be fully encumbered; no additional charges are allowed for work performed under this agreement, including travel, mileage, portal to portal, or other miscellaneous charges. Beyond the existing equipment, Customer is also seeking pricing for other equipment, software, system components, and services that are available through Vendor. If any stated pricing or discounts differ for the optional contract renewal periods, please explicitly specify for years 2, 3, etc. Otherwise, pricing will be considered firm throughout the initial term and renewals.

### 7.1. Maintenance of Existing System(s)

*Vendor must specify the system(s) for which maintenance services are being proposed.*

*Service and Maintenance on ALARMSOFT CENTRAL WORKS 2000 – A one year rate to maintain and provide 24hr tech support for the PC based alarm receiver interface software is \$2,795.00. This rate is set by the Mfg. After negotiations with AlarmSoft we were able to secure a rate of \$1,150.00 per year with a **five year commitment***

7.1.1 Specify the hourly labor rate for repairs/maintenance to the Customer security system, with all repairs to be completed within 24 hours of submission of a trouble report by Customer's security department (excluding shipping time for replacement parts.)

7.1.2. Specify the hourly labor rate applied to work performed during non-business hours (nights, weekends, holidays). Non-business hour labor rates may only be applied by Vendor if security department requests service be completed off hours. Otherwise, repairs will assumed to be performed on a next business day basis and billed at the standard labor rate.

### **SERVICE RATES:**

*Service call during normal business hours. (8am to 5pm) \$65.00 per hour*

*Service call after business hours: (5pm to 7am) \$110.00 per hour*

*\*Service is defined as a service person being dispatched to the location or remotely managing a system to effect change which resolves an issue. On site service will consist of performing troubleshooting techniques to repair or resolve and issue with a security, access or CCTV system. Any parts used during a service call will be added to the service charge. If a return trip is needed, the original work order will remain open and both trips will be billed out on that work order. If special equipment is needed to complete a repair, the exact cost of the rental or purchase of that equipment will be added to the invoice.*

## 7.2. Installation of Additional Components for Existing Security Systems

*Vendor must specify the system(s) and/or components for which installation services are being proposed*

This section requests fixed pricing for the installation of additional components to the existing Customer security systems. For each of the items below, provide itemized unit pricing for hardware and installation, fully integrated into the existing security system. This should include an itemized breakdown of the parts and labor charges.

For installation of new devices that require alarm cabling, include in the price materials and installation for a 100-foot cable run, assuming an existing accessible cable pathway. Also include the cost/foot to extend or reduce the cable distance. (In instances where there is no accessible cable path, a specific quote to create one will be requested at that time)

Included in the appendix are typical hardware specifications for standard door types. Use these for reference when developing the equivalent parts lists for the existing systems.

Any new components are to be fully integrated with the existing system. All components must include a one-year warranty on hardware, software and labor.

7.3. Installation of Cameras/Recording Devices

Vendor may also specify additional devices that will function with the existing security systems.

This section requests fixed pricing for the installation of cameras and recording devices. Depending on the Customer location, existing security cameras may or may not be integrated with the existing security system. In locations where cameras are not currently integrated, Customer would like to be able to engage the Vendor to install new cameras and recording equipment that can later be smoothly rolled into the overall system once an integrated security platform is in place.

For each of the items below, provide unit pricing for hardware and installation, including the cameras, mounts, and cabling. Assume a 100-foot cable run, using an existing accessible cable pathway. (In instances where there is no accessible cable path, a specific quote to create one will be requested at that time). Pricing should include an itemized breakdown of the parts and labor charges.

All components must include a one-year warranty on hardware, software and labor.
