SECURITY SYSTEMS AND SERVICES
MASTER PRICE AGREEMENT (MPA-419)
12/14/2009 – 6/30/2017

IN THE CASE OF A MULTIPLE AWARD, AGENCIES SHOULD CONTACT 3 VENDORS (OR 2 IF ONLY 2) LISTED ON THE MPA IN SEARCH OF THE LOWEST RATES. THE PRICE RATES LISTED ON THE MPA ARE THE MAXIMUM RATES THAT MAY BE CHARGED BY A VENDOR. PURCHASING STRONGLY ENCOURAGES AN AGENCY TO NEGOTIATE LOWER RATES AND INITIATE COMPETITION BETWEEN MPA VENDORS. QUOTES RECEIVED BY MPA VENDOR MUST INCLUDE LINE ITEM DESCRIPTION IN ORDER TO COMPARE PRICING, PREPARE RELEASES AND MATCH INVOICES.

PLEASE NOTE:

THIS MASTER PRICE AGREEMENT SHALL BE UTILIZED BY THE VARIOUS DEPARTMENTS AND AGENCIES OF THE STATE FOR INTERMITTENT PROJECTS WHERE TOTAL COSTS WILL NOT EXCEED \$50,000. PROJECTS EXCEEDING \$50,000 SHALL NOT BE ALLOWED UNDER PROVISIONS OF THE MPA WITHOUT PRIOR APPROVAL AND WRITTEN AUTHORIZATION FROM THE DIVISION OF PURCHASES.

<i>Dell Personal computers</i>	<i>1994</i>
<i>Ademco Vista Security Panels and equipment</i>	<i>2007</i>
<i>Honeywell Power Supplies</i>	<i>2001</i>

Enterprise building Integrator has been our preferred integrated platform since its introduction in 1991. Its introduction surpassed previous Honeywell platforms by expanding the capabilities to a world wide system. Communication technology incorporated allows customers with multiple locations the capability of one operating system for their entire enterprise

5.2. Number of Installations

Honeywell has numerous installations around the world with various degrees of integration. (Included in Proposal)

5.3 Training and Certification

For each of the product lines offered by the Vendor, list training and certifications completed through trade organizations and/or manufacturers. Indicate if certifications are company-wide or by individual (If individual, list below in 5.6).

Honeywell provides factory training for its employees on all offered products at our training facilities in Mendota Heights Minnesota and our headquarters in Morristown, New Jersey. In addition to scheduled training classes distance learning sessions are offered each week that cover a variety of our product and systems.

5.4 References (Included in Proposal)

5.5 Resumes (Included in Proposal)

5.6. Number of Support Technicians

How many support technicians are there in the Contractor's employment in the Rhode Island area who are experience in the repair of security systems and components? Specify the number of certified technicians for each product manufacturer/line that you support.

FOUR IN RHODE ISLAND, ONE IN MASSACHUSETTS, SEVEN IN CONNECTICUT

5.7. Location and Coverage Area of Support Technicians

Identify the base location(s) and the coverage area(s) for the technicians who would be expected to provide services to the Customer. Within this coverage area, these technicians maintain services for how many unique customer sites?

Honeywell's Southern New England District is comprised of two physical locations, one in Rocky Hill Connecticut and one in Pawtucket Rhode Island. Each office maintains an on call technician to respond to customers needs on weekends, holidays and off hours. This technician has the means to contact any other technician if required.

Technicians work loads are leveled using Service Work Management Software system throughout the district. Multiple technicians are often trained on one customer's specific system to allow fast response to emergency or repair calls. These same technicians perform preventive maintenance tasks as required to maintain the customers systems in peak operation condition.

5.8. Emergency Repair Services

How would the Customer summon emergency repair services on weekends, holidays, or other non-business hours? Provide appropriate primary and backup contact information.

Emergency and repair service calls are place through the Honeywell Global Response Center (GSRC) located in Atlanta Georgia Phone 1-800-972-4969. The GSRC is staffed 24 hours a day, seven days a week, 365 days a year with experienced, trained personnel. When a call is received the GSRC will contact the appropriate technician via our Field Automated Service Tool (FAST) providing him/her with instant accurate information about the call. All information about the call and the resolution is transmitted back to the GSRC through the FAST device to provide a history that the customer can review at any time via the world wide web. Repair information is transmitted electronically to customers e-mail or fax machine on completion of the service call.

6. MAINTENANCE/REPAIR REQUIREMENTS

Note: Some responding vendors may provide sales or distribution of equipment only, and rely on integrators to provide installation and maintenance to the end user. Vendors that do not provide support and/or maintenance services do not need to respond to the requirements of this section. Instead, simply indicate such in your response, and include a list of authorized and/or recommended contractors through which installation and maintenance are available. (Ideally one or more of these contractors will have been notified by you of your intention to submit for this RFP, and will have submitted a corresponding proposal for the installation and maintenance.)

Honeywell does not support Paradox or DSX access control systems at this time. Maintenance and repair for Honeywell supported systems and various CCTV Cameras are available through Honeywell.

6.1. System Maintenance

Vendor must be capable of the repair or replacement of all system components for the existing security system(s) for which services are being proposed, including but not limited to:

- System software
- Control panels
- Motion detectors
- Door access controls
- Window alarm protection
- Electronic equipment alarm protection
- Exterior door alarms
- Transmission of alarms to Security Department
- Alarm system wiring

All hardware and software components used for repair or replacement must meet system specifications and carry a manufacturer's warranty of at least one year.

Honeywell is capable of repair or replacement of security systems(s) installed by Honeywell. Honeywell has the capability to replace central panel equipment and upgrade customers old systems to current.

6.2. Response Time for Repairs

Vendor shall respond in a timely manner to requests from Customer's security department for repairs to faulty components or system failures. Vendor shall have a qualified support technician complete the necessary repairs within 24 hours of request (next business day, with option for security department to request emergency service that would include weekends/holidays).

Please specify average and maximum lead times for obtaining parts for the existing system.

Two hours max to contact, four hours max onsite

Lead time for parts, eight hours to two weeks (Honeywell Systems)

6.3. Installation of Additional System Components

At Customer's request, Vendor shall provide the installation of additional components that fully integrate with the current security system(s) for which Vendor is proposing services. This includes the component types listed previously under System Maintenance. Installation of new components shall be coordinated with Customer so as to provide minimal disruption to the system. All new installations shall come with a minimum one-year warranty on hardware, software, and labor.

Honeywell will provide proposals on request to upgrade, and integrate customers systems into Honeywell's Enterprise Building Integrator product. In most cases customers system that are not compatible with the EBI system would require change out of the central panels while remote door hardware such as readers, magnetic switches and door latches can be reused.

6.4. System Upgrades/Replacement

The Customer may seek to migrate its disparate security systems on campus to a more unified platform to simplify administration, operation, and maintenance, and provide a common base for future growth. This could consist of replacing existing systems with a single enterprise-wide system, or implementing a product that will interface with existing systems to provide a central point of administration. An important component of a new system is the capability of closely integrating with security cameras and digital video recording devices.

The customer is interested in identifying what other security system product lines Vendor is certified to sell, install, and maintain. This will allow the Customer to explore the option of engaging Vendor to replace or migrate parts of the existing systems during the term of the agreement. See details in the Pricing section.

Honeywell's Enterprise Building Manager and Digital Video Manager Systems

7. PRICING

Note about requested pricing: Customer is seeking pre-negotiated labor rates for repair, and hardware/installation rates for adding standard security components to the existing security systems. All quoted labor and parts rates are to be fully encumbered; no additional charges are allowed for work performed under this agreement, including travel, mileage, portal to portal, or other miscellaneous charges. Beyond the existing equipment, Customer is also seeking pricing for other equipment, software, system components, and services that are available through Vendor. If any stated pricing or discounts differ for the optional contract renewal periods, please explicitly specify for years 2, 3, etc. Otherwise, pricing will be considered firm throughout the initial term and renewals.

	<i>Straight Time</i>	<i>Overtime</i>
<i>Labor Rates:</i> 2008	\$139 00	\$208.50

Vendor must specify the system(s) for which maintenance services are being proposed.

7.1.1. Specify the hourly labor rate for repairs/maintenance to the Customer security system, with all repairs to be completed within 24 hours of submission of a trouble report by Customer's security department (excluding shipping time for replacement parts.)

7.1.2. Specify the hourly labor rate applied to work performed during non-business hours (nights, weekends, holidays). Non-business hour labor rates may only be applied by Vendor if security department requests service be completed off hours. Otherwise, repairs will assumed to be performed on a next business day basis and billed at the standard labor rate.

7.2. Installation of Additional Components for Existing Security Systems
Vendor must specify the system(s) and/or components for which installation services are being proposed.

This section requests fixed pricing for the installation of additional components to the existing Customer security systems. For each of the items below, provide itemized unit pricing for hardware and installation, fully integrated into the existing security system. This should include an itemized breakdown of the parts and labor charges.

For installation of new devices that require alarm cabling, include in the price materials and installation for a 100-foot cable run, assuming an existing accessible cable pathway. Also include the cost/foot to extend or reduce the cable distance. (In instances where there is no accessible cable path, a specific quote to create one will be requested at that time).

Included in the appendix are typical hardware specifications for standard door types. Use these for reference when developing the equivalent parts lists for the existing systems. Any new components are to be fully integrated with the existing system. All components must include a one-year warranty on hardware, software and labor.

7.3. Installation of Cameras/Recording Devices

Vendor may also specify additional devices that will function with the existing security systems.

This section requests fixed pricing for the installation of cameras and recording devices. Depending on the Customer location, existing security cameras may or may not be integrated with the existing security system. In locations where cameras are not currently integrated, Customer would like to be able to engage the Vendor to install new cameras and recording equipment that can later be smoothly rolled into the overall system once an integrated security platform is in place.

For each of the items below, provide unit pricing for hardware and installation, including the cameras, mounts, and cabling. Assume a 100-foot cable run, using an existing accessible cable pathway. (In instances where there is no accessible cable path, a specific quote to create one will be requested at that time). Pricing should include an itemized breakdown of the parts and labor charges.

All components must include a one-year warranty on hardware, software and labor.
