ADDENDUM #2

RFQ # 7449682 TITLE: SHUTTLE SECURITY SERVICE - URI

OPENING DATE AND TIME: 5/29/12 AT 10:00 AM

Here are the answers to a vendor's questions regarding the shuttle service.

1. Will a 7 passenger Caravan be acceptable? I would not reject a proposal based on the vehicle being a 7 passenger vehicle, provided that the vehicle met the mechanical requirements in terms of age listed in the bid. It would be one factor that would be weighed in evaluating the entire proposal.
2. Any certain requirements regarding radio communications? What type and Mfg? The radios utilized by the shuttle service would need to be compatible with the university's older security portable radios. The radios currently in use are Motorola and the frequency will be given to the successful bidder so they can have their radios programed.
3. Any specific type of placard in the front window stating "URI Shuttle"? Any placard that states "URI Shuttle" that can clearly be seen from outside the vehicle would be acceptable.
