ADDENDUM NUMBER THREE

RFQ # 7467366

**TITLE: Purchase and Install Generator and Transfer Switch-MS
Quonset Point Armory**

Closing Date and Time: 6/17/13 at 1:15PM

**Per the issuance of this ADDENDUM #3
(2 pages total.)**

Specification Change / Addition / Clarification

This addendum answers questions sent in by email.

Is copper wire required on the feeders or can aluminum be used. Copper

Where is the annunciator to be located? Where it meets all electrical and fire codes

Does the existing portable generator wiring system have to be removed completely or just disconnected? Completely removed and cleaned to include fixing holes in wall

The previous generator bids for the armory's (Bristol & Middletown, bid in April) we were directed by addendum to carry an engineering stamp for design drawings. State electrical inspector will require design drawings stamped by an electrical engineer. Please confirm if this cost should be carried by the contractor? It is not clearly defined in the solicitation. Same procedure will apply with this solicitation. Any costs should be included in bid price.

Quonset Point Armory**

Closing Date and Time: 6/17/13 at 1:15PM

Please clarify the 90 day schedule. This will not be enough time if stamped drawings are required and also most generators have 8 - 10 week lead times after approval. Please advise?

Time frame extended to 120 days. Schedule is meant as a guideline.
