Bid #7541376

23 Foot Enclosed Cabin Vessel

Vendor Questions:

Question: On the compliance form it asks for a locking cabin door and a aft canvas enclosure it is one or the other what one would you want? I would think the locking cabin door to lock up.

Response: The locking cabin door.

Question: For the windlass a pulpit would be needed do you want the windlass with pulpit or no pulpit no windlass and a molded anchor locker in deck?

Response: Remove the windlass,

Question: Getting a F250 4.2 fly by wire control, this will allow you to have a single handle control on both stations rather than the double style morse control it will also give you better fuel economy and more horse power.

Response: Agreed, please alter the specs to include F250 single handle control.
