April 8, 2014

**ADDENDUM NUMBER ONE**  
**RFQ # 7548596**

**TITLE: New Lifts at DMV-Testing and Emissions Center, 325 Melrose St., Prov., RI**  
**Closing Date and Time: 4/14/14 at 2:00 PM**

**Per the issuance of this ADDENDUM #1 (5 pages, including the cover sheet) the following is noted:**

This addendum posts the sign in sheet from the mandatory pre bid conference held 4/1/14 at 12 noon.

This addendum addresses the questions from the pre bid conference and answers those questions sent in on line to [bidinfo@purchasing.ri.gov](mailto:bidinfo@purchasing.ri.gov).

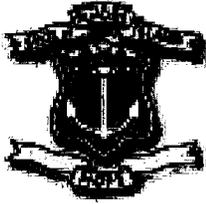

One lift needs to remain in operation at all time.

Demolition portion of this job only, will take place outside of normal business hours. Agency will coordinate with vendor. The remainder of the job will take place during the agency's normal business hours (Monday through Friday 7am-4pm).

The old lifts will be placed in fenced area (RIPTA Bus Parking area) directly behind the testing center as discussed at the pre bid. They will be placed on a railroad tie type landing (supplied by others). The lifts should remain as intact as possible. Bolts may be cut off to remove lifts from floor.

There will be no public reading of bid proposals. Purchasing will only acknowledge the names of vendors submitting proposals.

Looking at the building from the back, the vendor will be able to stage a dumpster to the immediate right of the right hand overhead door.

**ADDENDUM NUMBER ONE**  
**RFQ # 7548596**

**TITLE: New Lifts at DMV-Testing and Emissions Center, 325 Melrose St., Prov., RI**  
**Closing Date and Time: 4/14/14 at 2:00 PM**

Approval is given for the use of a high strength concrete 5,000psi or stronger in order to reach design strength earlier.

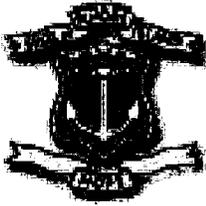

Attached is the cut sheet for the trench drain filter. Model to be used is FG-TD0F6.

The outlet invert at the catch basin to be utilized for the sump drainage is +/-12" below the top of slab, so gravity discharge will not be an option. Vendor responsible to trench from sump area to catch basin and install a 3" pipe. Agency responsible for supplying a pump.

1. Please re-state whether a Bid Bond is required and if both a Performance and Payment Bond will be required after award? This request is based on a discrepancy between the Solicitation page 1 and Instructions to Bidders pg. 3 of 7 and what was stated at the pre-bid meeting.

*A Bid bond will not be required. A payment and performance bond will be required at time of award.*

2. For the same reason as above, please re-state whether this is a Disk Based or not.  
*A CD is not required. An original and four(4) paper copies are required.*

**Closing Date and Time: 4/14/14 at 2:00 PM**

3. Payment Terms/Progress Payments: we do not see this addressed in the bid documents. This being a construction contract expected to run over the course of 2 months or so, with concrete and electrical subcontractors and the burden of expense of equipment delivered to the site prior to actual installation, we want to be assured that we can submit monthly or bi-monthly invoices for progress payments per a schedule of values that will be paid within 30 days.

DMV agrees to monthly invoicing as long our hired engineer signs off on invoice prior to us (DMV) approving payment to insure vendor is billing for completed work.

## *FloGard® LoPro Trench Drain Filter*

The **FloGard® LoPro Trench Drain Filter** is a modular filter designed to collect particles, debris, metals and petroleum hydrocarbons from stormwater runoff into trench drain systems. It includes a UV-resistant woven geo-textile wrapped around a perforated core encapsulating an absorbent which is easily replaced, providing for flexibility, ease of maintenance, and economy.

For the narrow and constricted areas often found in trench drains, the FloGard® LoPro Trench Drain Filter provides an effective solution to comply with stormwater runoff issues. The units perform as an effective filtering device at low flows ("first flush") and, because of the built-in high flow bypass, will not impede the drainage system's maximum design flow.

FloGard® LoPro Trench Drain Filters are available in sizes to fit common trench drain sizes, or are available as complete packaged "plug and play" units including filter integrated with steel trench drain.

**"MANDATORY" PRE-BID CONFERENCE SIGN IN SHEET**

Mandatory Pre-bid Conference: Any vendor who intends to submit a bid proposal in response to this solicitation must have its designated representative attend the mandatory pre-bid conference. The representative must register at the pre-bid conference and disclose the identity of the vendor whom he/she represents. Because attendance at the pre-bid conference is mandatory, a vendor's failure to attend and register at the pre-bid conference shall result in disqualification of the vendor's bid proposal as non-responsive to the solicitation.
