4. Q. Can the trails throughout the area where the tires are to be removed be widened to allow for access with heavy equipment?

If so, how extensive can the clearing be? Some large equipment could require that the trails be made 2-3 times wider than they currently are.

A. The trails may only be cleared enough for a pick-up truck to get through.

5. Q. Can we use containers other than "30 cubic yard containers" as long as the weight slips from RIRRC are forwarded to RIDEM?

If we use smaller containers, we could still figure out the total cubic yardage and bill per 30 yards. Please confirm.

A. No all containers must be 30 cubic yards per the bid specifications.

6. Q. Where at RIRRC will the tires be dumped?

A. That will have to be arranged with DEM and the RIRRC after the bid award.
