Addendum 2

Continuous Recruitment # 37

TITLE: Renewable Energy at Rhode Island Schools (Regional Greenhouse Gas Initiative 2014 Plan)

Submission Deadline: Continuous Recruitment through 17 April 2015 at 4:00 PM (ET)

The following question has been received:

Are solar installations utilizing Power Purchase Agreements permissible under CR-37?

Answer:

Solar installations, in Rhode Island, over the past several years have been either privately financed or have had 3rd party power purchase agreements executed between property owners and a renewable energy developer. The solar school projects can be financed under either arrangement.

During the application review process the OER will be evaluating the financial cost of the installation: federal and state (including the state's Renewable Energy Fund at Commerce RI) incentives leveraged for the project and the price per watt of the installation.
