Addendum 3

Continuous Recruitment # 37

TITLE: Renewable Energy at Rhode Island Schools (Regional Greenhouse Gas Initiative 2014 Plan)

Submission Deadline: Continuous Recruitment through 17 April 2015 at 4:00 PM (ET)

The following questions have been received:

Are solar installations utilizing Power Purchase Agreements permissible under CR-37?

Answer:

In addition to answer posted in Addendum #2, Power Purchase Agreements are eligible, but not required. The Office of Energy Resources will not know how many PPA are received, if any, until the CR-37 deadline closes.

We are also submitting a matching proposal for this project to Commerce RI. It looks like our project will be eligible for up to \$42,500 under that program. How should those funds be recognized and/or applied in our application, which has the total cost with 25% school share?

Answer:

All applicants need to provide a budgetary breakdown on the total cost of their project, and identifying which state and/or federal funds and private funding sources are being leveraged for the solar school project in the budgetary breakdown.
