INTRODUCTION:

The Rhode Island Department of Administration/Division of Purchases, on behalf of all Rhode Island departments, agencies, and institutions of higher education, is soliciting proposals from qualified firms to provide Laboratory Supplies & Equipment under one or more Statewide Master Price Agreement(s), as described elsewhere herein, and in accordance with the terms of this the State's General Conditions of Purchase, which can be found here: [General Conditions of Purchase \(220-RICR-30-00-13\) - Rhode Island Department of State](#)

The request for bid is for a specific list of manufacturers, from whom either directly or indirectly Rhode Island has purchased items and/or anticipates purchasing items, with a Contractor-supplied manufacturer-specific percent discount off list price provided and applicable to all items produced by said manufacturer.

A complete Contractor-provided listing of categories covering the Contractor's catalog of all available items, with a category-specific percent discount off list price provided and applicable to all items defined by each category.

This solicitation will result in one or more statewide Master Price Agreements (MPAs) for the purchase of Laboratory Supplies & Equipment for the period designated in this solicitation. One or more contract(s) comprising (a) statewide MPA(s) will be issued incorporating all agreed contract pricing.

Vendors may submit a partial list of the materials requested in this solicitation.

ORDER PLACEMENT:

Contractor should maintain a live, twenty-four (24) hour local or toll-free telephone access number for all Contract Users to respond to questions. All contact information including access numbers should be included in the response and preferably be available to all Contract Users online. Prior to an award, successful Bidders will be required to identify/establish one or more local or toll-free access numbers allowing free calls from all State office locations. Please indicate your company's ability to meet these requirements, including detailed information on typical procedures for placing and verifying orders.

CONTRACT LIST MAINTENANCE:

Contractor must agree to an annual evaluation of the contract list and the State's top spend items. Contractor and the State will revise items on the contract list to replace discontinued manufacturers to rebalance the list through additions and deletions ensuring that the items that accounted for the largest spend in the prior twelve (12) months are included on the contract list. Recommended additions and deletions will be reviewed with Purchasing and revisions to the contract list may follow, if agreed to by the Chief Purchasing Agent. New additions to the contract list shall be guaranteed better pricing than previously achieved through either the manufacturer discount list and/or category discount schedule list.

Please indicate your company's ability to meet this requirement and describe typical contract list maintenance procedures for similar clients.

FILL-RATE REQUIREMENTS:

Contractor should maintain a fill rate of 98% for contracted contract list items. The selected Contractor(s) should also maintain a 95% fill rate on the full line catalog. (fill rate is defined as the total number of requisition lines filled/divided by the number of lines requested over a given period. The difference, therefore, would be items on back-order).

Please indicate your company's ability to meet this requirement and include historic fill rates for contract lists and full line catalogs.

RESPONSE TIMES TO ORDERS:

Contractor(s) must be able to fill and deliver orders for general laboratory supplies on-site within one (1) day of order placement by Contract users, either via the internet or fax based on an order submitted by 5:00 p.m. the prior day.

Please indicate your company's ability to meet these requirements and include typical response time to orders (by product subcategory, if applicable).

DELIVERY:

Contractor or assignee should make delivery of each order to an inside location (e.g., warehouse, desktop, etc.) as directed by the ordering customer. Contractor must comply with parking and delivery requirements (times, locations, permits, etc.) of the ordering customer.

Vendor will obtain "ship to" information from each participating customer.

Please indicate your company's ability to provide this level of shipping detail for all orders, and any other information you provide as a standard.

RETURNS:

Any materials delivered in poor condition, more than the amount authorized by the ordering customer, or not ordered by the ordering customer may, at the discretion of the ordering customer, be returned to the Contractor's warehouse at the Contractor's expense within 30-days.

Credit for returned good should be made within two (2) business days once Contractor receives returned goods. A returned goods authorization procedure shall be agreed to prior to award.

Please indicate your company's ability to meet these requirements.

At least one Customer Service Representative should be available during Contractor's operating hours. All service representatives should have on-line access to information to provide immediate response to inquiries concerning the status of orders (shipped or pending), delivery information, back-order information, Statewide contract pricing, contracted product offerings/exclusions, billing questions or issues, contract compliance requirements, and general product information.
