ADDENDUM #1

**RFQ# 7598551 TITLE: REMOVE AND REPLACE SECURITY CAMERAS AT
WICKFORD JUNCTION**

SUBMISSION DEADLINE: 01/30/2019 at 10:30 AM

The following items are included in this addendum:

1. Responses to submitted questions
2. Pre-bid sign in sheet

Alyssa Ward

A handwritten signature in black ink, appearing to read 'Alyssa Ward', written over a horizontal line.

Alyssa Ward
Buyer I

Solicitation Number- 7598551

Questions:

Is this solicitation allowing for approved equals/alternate requests for cameras?

A: The mentioned camera models need to be followed. However, the scope calls for current models. So, if the model somehow gets discontinued during the process, current models of the mentioned models in the scope should be considered (such as a model replacing the mentioned one from the camera manufacturer in the scope, or one that is similar).

Line item 9 in scope of work: The PoE provided by contractor. Do we need to provide new network switches or are the switches in place currently going to be used for all new and replacement cameras?

A: Current switches may be used. However, the new camera installations will also require additional switches with PoE ports. New network switches should be installed to support these.

Line item 12 in scope of work: Will a combined RAID storage and OS drive in one server be acceptable or must they be physically separate as noted in line item?

A: Combined RAID and OS will be acceptable as long as it meets the requirements. The R-Series NVR Models on the Senstar website can be used as a reference of what is needed. They also include additional licenses needed for Senstar/Aimetis as well if you choose to go with these.

Are equivalent substitutions of Axis cameras acceptable?

A: It has to be kept as Axis to keep consistency of models the same with the exception of the Hanwha cameras

Will all cameras be POE (power over ethernet)?

A: Yes

Working hours for awarded vendor?

A: 7:00 am-3:30pm

If camera model that is requested is no longer available, will current models be acceptable?

A: Yes; they have to be compatible with camera model that is no longer available.

Clarification as to the location of the cameras in the stairwells:

A: The cameras in the stairwell will be at the top of each stair along with one extra one on level 1 for the space under the stairwell.

Clarification on the analog situation in the elevators:

A: We will need the elevators to be wireless no analogue. The cost would be higher due to the elevator company will have to come in to wire the elevators.

"NON-MANDATORY" PRE-BID CONFERENCE SIGN IN SHEET

BID NUMBER: 7598551
