The public copy must be submitted in .pdf (portable document file) format on a *read-only* CD-R media disc. The disc must include *all of the documents* submitted in response to the solicitation concatenated or merged into one file. The file must be named in the following manner:

BidNumber\_DateofBid\_VendorName\_VendorID.pdf

The Bidder Certification Cover Form contains all of the information for the file name. The date of bid must appear as mm-dd-yyyy. The vendor name must appear as one word, with no spaces or punctuation. Underscores must separate the fields.

**Example:** 7543210\_11-08-2013\_OceanStateCompanyInc\_9867.pdf

The public copy disc must be separately enclosed in a protective cover clearly marked "Public Copy" and include the following information (all available from the Bidder Certification Cover Form): (1) title of solicitation; (2) name of bidder and RIVIP vendor ID number; (3) bid number; and (4) date of bid.

The public copy may redact any trade secrets or commercial or financial information which is of a privileged or confidential nature pursuant to the "Access to Public Records Act," R. I. Gen. Laws §§ 38-2-1 *et seq.*

For further information on how to comply with this statutory requirement, see R. I. Gen. Laws §§ 37-2-18(b) and (j). Also see Procurement Regulation 5.11 accessible at [www.ridop.ri.gov](http://www.ridop.ri.gov)

**Notice to Vendors:** This solicitation is a re-bid of project 7611870. The specified equipment/products within the project manual and approved submitted equals from prior solicitation (7611870) noted below will be the only products accepted. No further substitute request will be allowed.

**FREQUENTLY ASKED QUESTIONS WITH RESPONSES AND APPROVED EQUALS**

1) Alternate Wireless Mesh Network:

The alternate being suggested is Fluidmesh. The Fluidmesh solution operates on a 5 GHz Frequency Range in the unlicensed band. This solution would provide better reliability in areas where Direct Line of Sight may not be available year-round due to trees or other temporary structures. It is also less susceptible to any type of movement. With the Millimeter Wave solution in the 60 GHz spectrum, it is critical to ensure that the antenna has little to no movement. This makes it ideal for large structure and dedicated towers but in the case of some traffic, power, or signage structures the movement can impact the system performance. Attached is are the specifications for the Fluidmesh FM 3200 Base Unit as well as the FM 1200 Volo. This system would provide a mesh network with a great deal of flexibility and expansion. Please review the provided documentation regarding the Fluidmesh Solution as an alternate or add on to the specified 60 GHz solution. **RESPONSE: The Fluidmesh components are considered an approved equal.**

2) Gate Locations:

In the drawings associated with the wireless system (SE-MESH-100) defines the locations of the radios to be installed. However, it does not appear to match the specified counts in the Project manual. The system calls for the system is based upon 3 Mesh Ends and 17 Mesh Points. The drawing reflects the 3 Mesh Ends on the buildings but then shows 11 other points distributed through the area. It is assumed that these are existing poles. The drawing also does not reflect the gate locations. It is assumed that the Gates are reflected in SE-CFA-100. Please clarify the precise location and counts of the radios, understanding that the 8 New locations will not be precise as they will rely on a site survey. **RESPONSE: There are a total of 17 mesh points. 8 of the mesh points will be on new poles, of which a survey will be required. The remaining 9 mesh points will be mounted to existing poles.**

3) Cameras and Access Control:

The project manual and drawings reflect camera and access control. However, it does not indicate if these are to be provide as part of the project or are existing. If these are existing, please indicate the manufacture and current software used for the camera and access control system. If the contractor is to include any new cameras or access control equipment as part of the project, please specify those requirements. **RESPONSE: These devices are existing. The card readers are connected to the existing S2 access control system and the cameras connect to the Avigilon system. No additional access control or video is required for this project.**

4) Power at new pole locations:

The 8 new poles that will be required will also require power. It is assumed that there is existing power at the locations as they currently have power to operate the gate controllers. Please confirm that this is the case. In addition since the 60 GHz system is impacted by movement it is highly recommended that a steel pole is specified to minimize movement of the antenna utilizing the 60 GHz Mesh Points. **RESPONSE: Per the scope of work – the Contractor shall provide all necessary infrastructure, including power, conduit and cables to connect these mesh units to the DoIT network. Network cable from the mesh units shall be routed to the nearest IDF room in the respective building.**
