 2. Revised scope: see attached

Kathy Missell
Chief Buyer

Solicitation Number 7661814
Addenda No. 4

Question #10 Clarification

10. Can you please confirm the scope of work in regard to the new electrical service/generator/transformer? Sheet E101 shows these items by owner, we assume it includes all required concrete and site work to support the new electrical?

The new electrical services and transformer are part of the scope for this project. The awarded contractor will be responsible for all make-ready work including equipment upgrades, concrete, site work, etc. Contractor will also be responsible for permitting and all other paperwork. Owner's role will be limited to helping facilitate communications and scheduling with National Grid.

The generator and switchgear have been removed from the project scope.
