When a customer calls into the dedicated phone number of 800-766-7000, a simple two-prompt system provides a guide to the caller's inquiry by directing the call to a specific customer service group trained to handle that need.

Fisher Scientific employs state-of-the-art telecommunications systems to provide the highest levels of service care. Call response rates are measured through a program called CMS, which is a function of our Lucent telephone system. We are able to track a variety of statistics via this system, from the number of calls received down to actual daily Customer Service Representative activity. We also perform call monitoring, which is documented by a call monitor observation form.

Customer service is available seven days a week, 24 hours a day. However, normal working hours are from 7 AM to 10 PM (EST) Monday through Friday. Outside of normal working hours, users can still call our customer service center toll-free for emergency needs. Once an emergency need is established, the answering service contacts a Fisher Scientific associate on our 24x7 emergency list.
