### **SCOPE OF WORK**

Topic areas for services covered by this request include but are not limited to the following:

As part of the Initiative for a Healthy Weight's (IHW) goals to make healthy eating and active living easier choices for all residents, IHW is working with partners to implement a variety of policy and environmental interventions across the state that focus on:

- Increasing availability and affordability of healthy foods
- Improving neighborhood safety

- Improving community walkability and bikeability
- Improving the school environment to support healthy eating and physical activity

In addition, IHW is implementing specific programs and campaigns such as:

- We Can!

**Task A: Resident Survey.** As one way to evaluate the effectiveness of these strategies, IHW plans to conduct a statewide survey of residents. The goal for this survey is to help track state level changes in residents' access, awareness, perceptions, and behaviors. Survey results will help IHW monitor progress and make programmatic decisions.

The consultant will be responsible for developing survey tools and methods, maintaining participant confidentiality, conducting the survey, collecting and analyzing data, and creating reports. The survey should reach a large enough number of Rhode Islanders to yield a representative sample. As lower income populations and families with children under 18 are a priority, methods to ensure this population is reached are encouraged.

Qualitative and quantitative data exists in many forms on the status of school policies. Our goal is to compile this information at the school or district level and use the results to target for technical assistance. Priority will be given to school in the 3 communities funded by IHW through the American Recovery and Reinvestment Act of 2009.

The consultant will be responsible for working closely with IHW's partners to identify and obtain existing data sets and other sources of qualitative data, analyze data, and develop school or district level reports. The consultant will work closely with IHW to develop a plan for data analysis and reporting. Throughout the project, the consultant will work with IHW to identify gaps in the existing data and make recommendations for addressing the gaps.

The contractor will be responsible for the following activities and will provide the following deliverables. **The contractor will be reimbursed based on delivery of the products below, not on a monthly basis for staff time, materials, etc.**
