HIGHWAY MAINTENANCE SECTION**

SPECIFICATION FOR SOLAR SALT FOR REMOVAL OF ICE AND SNOW

CHEMICAL COMPOSITION

The sodium chloride shall conform to the following requirements as to chemical composition

- A Total chlorides expressed as NaCl min % 95.0

GRADING

- A The sodium chloride shall be in the form of Solar Salt and shall conform to the following specifications as determined by laboratory sieves:

Passing a 5/8" sieve, percent 100  
Passing a 7/16" sieve, percent 95 to 100  
Maximum passing a 4 mesh sieve, percent 75  
Maximum passing a 8 mesh sieve, percent 40  
Maximum passing a 30-mesh sieve, percent 10

- B Salt shall be in a free flowing condition when received at the point of delivery

MOISTURE

Salt delivered under these specifications shall not exceed three percent (3.0%) moisture for solar

ANTICAKE

- A In order to prevent caking while in storage following delivery, all bulk salt shall be uniformly treated with a sodium chloride conditioner prior to delivery. The conditioner shall be introduced uniformly throughout the sodium chloride at a rate equivalent to the two pounds of Anticake, Storite, or equal, per ton of sodium chloride.
- B Each successful bidder shall furnish a laboratory procedure method for determining the uniform presence of his respective anticake.

## INSPECTION

The purchaser or his representative shall be provided free entry and access at the storage areas for sampling. It is anticipated that determination for initial compliance will be made from samples obtained from the supplier's storage areas or from railcars if no storage areas are provided within the state. Shipments to the purchaser's points of delivery may be randomly sampled for moisture content and gradation control. If in doubt, complete analysis may be made on these samples.

## PENALTY AND PRICE ADJUSTMENT

For each percent by which moisture content exceeds maximums specified, the contractor will be penalized by reducing the price of the salt by two (2) percent.

For each percent by which gradation exceeds the maximums allowed, the contractor will be penalized by reducing the price of the salt by one (1) percent.

Penalties, if any, will be assessed against the accumulated and mixed samples of each day's deliveries to each location. Said sample shall be representative of the gradation and moisture content of all salt delivered that day.

**RHODE ISLAND DEPARTMENT OF TRANSPORTATION  
DIVISION OF MAINTENANCE**

**SPECIFICATIONS FOR SODIUM CHLORIDE  
(ROCK SALT)**

**CLASSIFICATION**

This specification covers sodium chloride contained from natural deposits (rock salt) and shall conform to AASHA M-143-70 except for specifics as noted below

**CHEMICAL REQUIREMENT**

The sodium chloride shall conform to a chemical composition of a minimum of 95.0 percent. Rock salt having a chemical composition below 95.0 percent will be accepted with an adjustment equal to 95.0 percent less the actual percent sodium chloride of the rock salt being received, and will be figured on delivered cost. Any material with a sodium chloride content of less than 92.0 percent may be rejected at the sole discretion of the State of Rhode Island. The State's decision to reject material is not subject to appeal.

**PHYSICAL REQUIREMENTS**

- A The gradation when tested by means of laboratory sieves shall conform to the following requirements for particle size without any variation:

<u>Sieve Size</u>	<u>Percent Passing by Weight</u>
½ inch	100
3/8 inch	95 to 100
No. 4	20 to 90
No. 8	10 to 60
No. 30	0 to 10

- B The moisture content of the sodium chloride shall not exceed 0.5 percent. Sodium chloride with a moisture content over 0.5 percent will be accepted with a reduction from the delivered bid price computed on the average moisture content of the sample minus 0.5 percent.
- C In order to prevent caking while in storage following delivery, all sodium chloride shall be uniformly treated with an anti-caking conditioner (YFS or equal). The conditioner shall be uniformly applied to the sodium chloride at a rate which when sampled shall have a minimum of 20 parts per million (PPM). The use of a colored conditioner is desired.

## CONDITION

The sodium chloride shall arrive at the purchaser's delivery point in a free flowing and useable condition

## SAMPLING

Each sample submitted for testing shall consist of minimum of three increments selected at random from the material. Each increment shall be at least one pound in weight and not include the top inch of stored material. Every attempt shall be made to insure a composition sample representative of the pile. Samples for chemical composition, gradation, water content and anti-caking shall be taken at the supplier's stockpile. Samples for moisture content, gradation, and anti-caking may also be obtained at the time of delivery to the purchaser's delivery destination

## TESTING

- A. Chemical composition testing shall follow AASHTO M-143 Appendix A1. Rapid Method of Test for sodium chloride except for controversy, in which case testing shall conform to paragraphs 33.347-33.054 and paragraph 33.059 of the eleventh edition of Official Methods of Analysis of the Association of Official Analytical Chemists or comparable absorption analysis
- B. Particle size analysis shall consist of using sieves with square openings mounted on substantial frames or interlocked in a manner as to insure loss of material during sieving. Woven wire cloth shall conform to AASHTO m92. Gradation analysis shall be made on oven dried material and the sample shall weigh after drying at least 500 grams. In no case shall the fraction retained on any sieve at the completion of the sieving operation weigh more than four grams per square inch of sieving surface (this is 200 grams for 8 inch diameter round sieves). If sieving is completed by hand shaking lateral and vertical motion with occasional jarring action so as to keep the material moving continuously over the surfaces of the sieves for a time of not less than three minutes. When mechanical shaking is provided the time limit shall be a maximum of five minutes. The balance of scale be sensitive to within 0.2 percent of the weight of the sample to be tested.
- C. Moisture content shall be determined by a method of weighing before and after oven drying at 110 degrees plus or minus 5 degrees C (230 degrees plus or minus 9 degrees F) for a minimum of four hours
- D. The test for anti-caking material shall be made following the attached method for the colorimetric determined of YPS treated rock salt. For an anti-caking material other than YPS, the successful bidder shall indicate the chemical nature of the material, and shall furnish a laboratory procedure for method for determining the uniform presence of its respective anti-cake

## Terms and Conditions

### BID STANDARD TERMS AND CONDITIONS

#### TERMS AND CONDITIONS FOR THIS BID

#### PURCHASE AGREEMENT BID

**BIDDING** (a) A single price shall be quoted for each item against which a proposal is submitted. This price will be the maximum in effect during the agreement period. Any price decline at the manufacturer's level shall be reflected in a reduction of the agreement price to the State. (b) Quantities, if any, are estimated only. The agreement shall cover the actual quantities ordered during the period. Deliveries will be billed at the single, firm, awarded unit price quoted regardless of the quantities ordered. (c) Bid price is net F O B destination and shall include inside delivery at no extra cost. (d) Bids for single items and/or a small percentage of total items listed, may, at the State's sole option, be rejected as being non-responsive to the intent of this request. **ORDERING** (a) The User Agency(s) will submit individual orders for the various items and various quantities as may be required during the agreement period. (b) Exception - Regardless of any agreement resulting from this bid, the State reserves the right to solicit prices separately for any extra large requirements for delivery to specific destinations.

#### QUARTERLY REPORTS

**REPORTS** - The Vendor agrees to provide the State with quarterly reports describing activity against this Price Agreement. If this is a Master Price Agreement, such reports shall include usage by municipalities, quasi-public agencies, schools, etc. All reports shall contain the following data: (1) Billing volume in dollars and (2) quantity shipped for each line item in the price agreement. When there are no line items in the price agreement, vendor shall report volume by catalog order numbers, with a brief description of each order number. Reports must be submitted to the RI Division of Purchases to the attention BUYER named in this notice, identifying the Agreement number and the Reporting Period. Quarterly reports shall be due 45 calendar days after the end of each quarter. Failure to submit required reports shall be considered a breach of the contractor's obligations and may be considered, at the discretion of the State Purchasing Agent, sufficient cause for the termination of the agreement and other outstanding agreements and orders, and possible suspension from participation in additional State procurements.

#### AUTHORIZATION AND RELEASE

In no event shall the Vendor deliver goods or provide service until such time as a duly authorized release document is certified by the ordering Agency. A Direct Purchase Order (DPO) shall be created by the agency listing the items ordered, using the pricing and format set forth in the Master Blanket. All pricing shall be as described in the Master Blanket and is considered to be fixed and firm for the term of the Agreement, unless specifically noted to the contrary herein. All prices include prepaid freight. Freight, taxes, surcharges, or other additional charges will not be honored unless reflected in Master Blanket.

#### MPA BID AWARD (STATEWIDE APPLICABILITY)

**STATEWIDE APPLICABILITY** - Political Subdivisions (cities, towns, schools, quasi-public agencies), as authorized by law, may participate in this Agreement. All ordering and billing shall be between the vendor and the political subdivision (only).

#### VENDOR SPECIFICATIONS

ALL VENDORS MUST INCLUDE SPECIFICATIONS WITH BID PROPOSAL (EVEN THOSE BIDDING BRAND SPECIFIED). FAILURE TO SUBMIT SPECIFICATIONS WITH BID PROPOSAL

MAY RESULT IN DISQUALIFICATION OF BID ITEMS IN CATALOGS MUST BE CLEARLY MARKED AND PAGES TABBED

**HAZARDOUS MATERIAL**

HAZARDOUS MATERIAL SAFETY DATA SHEET IS TO BE SUBMITTED BY THE SUCCESSFUL BIDDER AFTER THEIR RECEIPT OF THE PURCHASE ORDER AND BEFORE OR WITH THE FIRST DELIVERY. THIS SHEET WILL BE KEPT ON FILE AS A REFERENCE FOR FUTURE DELIVERIES MADE UNDER THIS CONTRACT THIS SHEET IS MANDATED BY RI STATE LAW CHAPTER 28-21 HAZARDOUS SUBSTANCE RIGHT-TO-KNOW ACT FAILURE TO COMPLY WITH THIS REQUEST WILL RESULT IN LOSS OF CONTRACT

**CLOTHING SAMPLES**

IF SAMPLES ARE REQUESTED, THEY MUST BE PROVIDED WITHIN TEN (10) WORKING DAYS OF REQUEST DATE FAILURE TO DO SO MAY RESULT IN DISQUALIFICATION OF BID

**DELIVERY PER AGENCY**

DELIVERY OF GOODS OR SERVICES AS REQUESTED BY AGENCY
