Item	Class-Item	Quantity	Unit	Unit Price	Total
	<p>BLANKET REQUIREMENTS: 10/1/05 - 6/30/06</p> <p>MASTER PRICE AGREEMENT #125</p> <p>BIDDING</p> <p>(a) A single price shall be quoted for each item against which a proposal is submitted. This price will be the maximum in effect during the agreement period. Any price decline at the manufacturer's level shall be reflected in a reduction of the agreement price to the State.</p> <p>(b) Quantities, if any, are estimated only. The agreement shall cover the actual quantities ordering during the period. Deliveries will be billed at the single, firm, awarded unit price quoted regardless of the quantities ordered.</p> <p>(c) Bid price is net F.O.B. destination and shall include inside delivery at no extra cost.</p> <p>(d) Bids for single items and/or a small percentage of total items listed, may, at the State's sole option, be rejected as being non-responsive to the intent of this request.</p> <p>ORDERING</p> <p>(a) The User Agency(s) will submit individual orders for the various items and various quantities as may be required during the agreement period.</p> <p>(b) Exception - Regardless of any agreement resulting from this bid, the State reserves the right to solicit prices separately for any extra large requirements for delivery to specific destinations.</p>				

It is the Vendor's responsibility to check and download any and all addenda from the RIVIP. This offer may not be considered unless a signed RIVIP generated Bidder Certification Cover Form is attached and the Unit Price column is completed. The signed Certification Cover Form must be attached to the front of the offer. When delivering offers in person to One Capitol Hill, vendors are advised to allow at least one hour additional time for clearance through security checkpoints.

	<p>REPORTS - The Vendor agrees to provide the State with bi-weekly reports describing activity against this Price Agreement for each delivery location based on materials ordered and delivered. If this is a Master Price Agreement, such reports shall include usage by municipalities, quasi-public agencies, schools, etc. All reports shall contain the following data: (1) Billing volume in dollars and (2) quantity shipped for each item per location in the price agreement. When there are no line items in the price agreement, vendor shall report volume by catalog order numbers, with a brief description of each order number.</p> <p>Reports must be submitted to the RI Division of Purchases to the attention BUYER named in this notice, identifying the Agreement number and the Reporting Period. Bi-weekly reports shall be due 7 calendar days after the end of each reporting period. Failure to submit required reports shall be considered a breach of the contractor's obligations and may be considered, at the discretion of the State Purchasing Agent, sufficient cause for the termination of the agreement and other outstanding agreements and orders, and possible suspension from participation in additional State procurements.</p> <p>STATEWIDE APPLICABILITY - Political Subdivisions (cities, towns, schools, quasi-public agencies), as authorized by law, may participate in this Agreement. All ordering and billing shall be between the vendor and the political subdivision (only).</p>				

It is the Vendor's responsibility to check and download any and all addenda from the RIVIP. This offer may not be considered unless a signed RIVIP generated Bidder Certification Cover Form is attached and the Unit Price column is completed. RHODE ISLAND DEPARTMENT OF TRANSPORTATION
DIVISION OF MAINTENANCE

SPECIFICATIONS FOR SODIUM CHLORIDE
(ROCK SALT)

CLASSIFICATION

This specification covers sodium chloride contained from natural deposits (rock salt) and shall conform to AASHA M-143-70 except for specifics as noted below.

CHEMICAL REQUIREMENTS

The sodium chloride shall conform to a chemical composition of a minimum of 95.0 percent. Rock salt having a chemical composition below 95.0 percent will be accepted with an adjustment equal to 95.0 percent less the actual percent sodium chloride of the rock salt being received, and will be figured on delivered cost. Any material with a sodium chloride content of less than 92.0 percent may be rejected at the sole discretion of the State of Rhode Island. The State's decision to reject material is not subject to appeal.

PHYSICAL REQUIREMENTS

- a. The gradation when tested by means of laboratory sieves shall conform to the following requirements for particle size without any variation:

<u>Sieve Size</u>	<u>Percent Passing by Weight</u>
	100
½ inch	95-100
3/8 inch	20-90
No. 4	10-60
No. 8	0-10
No. 30	

- b. The moisture content of the sodium chloride shall not exceed 0.5 percent. Sodium chloride with a moisture content over 0.5 percent will be accepted with a reduction from the delivered bid price computed on the average moisture content of the sample minus 0.5 percent.
- c. In order to prevent caking while in storage following delivery, all sodium chloride shall be uniformly treated with an anti-caking conditioner (YFS or equal). The conditioner shall be uniformly applied to the sodium chloride at a rate which when sampled shall have a minimum of 20 parts per million (PPM). The use of a colored conditioner is desired.

CONDITION

The sodium chloride shall arrive at the purchaser's delivery point in a free flowing and useable condition.

SAMPLING

Each sample submitted for testing shall consist of a minimum of three increments selected at random from the material. Each increment shall be at least a pound in weight and not include the top inch of stored material. Every attempt shall be made to insure a composition sample representative of the pile. Samples for chemical composition, gradation, water content and anti-caking shall be taken at the suppliers stockpile. Samples for moisture content, gradation, and anti-caking may also be obtained at the time of delivery to the purchaser's delivery destination.

TESTING

- a. Chemical composition testing shall follow AASHTO M-143 Appendix A1. Rapid Method of Test for sodium Chloride except for controversy, in which case testing shall conform to paragraphs 33.347-33.054 and paragraph 33.059 of the eleventh edition of Official Methods of Analysis of the Association of Official Analytical Chemists or comparable absorption analysis.
- b. Particle size analysis shall consist of using sieves with square openings mounted on substantial frames or interlocked in a manner as to insure loss of material during sieving. Woven wire cloth shall conform to AASHTO m92. Gradation analysis shall be made on oven dried material and the sample shall weigh at least 500 grams. In no case shall the fraction retained on any sieve at the completion of the sieving operation weigh more than four grams per square inch of sieving surface (this is 200 grams for 8 inch diameter round sieves). If sieving is completed by hand shaking lateral and vertical motion with occasional jarring action so as to keep the material moving continuously over the surfaces of the sieves for a time of not less than three minutes. When mechanical shaking is provided the time limit shall be a maximum of five minutes. The balance of scale be sensitive to within 0.2 percent of the weight of the sample to be tested.
- c. Moisture content shall be determined by a method of weighing before and after oven drying at 110 degrees plus or minus 5 degrees C (230 degrees plus or minus 9 degrees F) for a minimum of four hours.
- d. The test for anti-caking material shall be made following the attached method for the colorimetric determined of YPS treated rock salt. For an anti-caking material other than YPS, the successful bidder shall indicate the chemical nature of the material, and shall furnish a laboratory procedure for

INSPECTION

The purchaser or his representative shall be provided free entry and access at the storage areas for sampling. It is anticipated that determination for initial compliance will be made from samples obtained from the supplier's storage areas or from railcars if no storage areas are provided within the state. Shipments to the purchaser's points of delivery may be randomly sampled for moisture content and gradation control. If in doubt, complete analysis may be made on these samples.

PENALTY AND PRICE ADJUSTMENT

For each percent by which moisture content exceeds maximums specified, the contractor will be penalized by reducing the price of the salt by two (2) percent.

For each percent by which gradation exceed the maximums allowed, the contractor will be penalized by reducing the price of the salt by one (1) percent.

Penalties, if any, will be assessed against the accumulated and mixed samples of each day's deliveries to each location. Said sample shall be representative of the gradation and moisture content of all salt delivered that day.
